Release Notes

This document contains information about **V 4.2.11**, including bug fixes and new features in this release.

NEW FEATURES

ALPO-2735   **"Customer reference" field in order editor now permanently editable**
The "Customer reference" field can now be edited permanently and independently of the status of the port order in all port modules. It is not relevant to port orders and is only used by ALPO users to manage their orders in ALPO.

BUXFIXES

ALPO-2617   **Bug fixing for container data entry**
A bug has been fixed when entering container data (length, height).

ALPO-3110   **Bug fixing when searching for the BHT status "AEB"**
An error has been fixed so that the BHT search for the status "AEB" now returns hits.
