

Release Notes

This document contains information about **V 4.2.8**, including bug fixes and new features in this release.

NEW FEATURES

- ALPO-3457** **ZAPP module - customs interdiction at exit (status UAG) no longer blocks the order**
ZAPP orders with the status UAG (= customs interdiction at exit) now remain in the process status = DECLARED and can therefore be canceled. The order is colored red in the ZAPP module list to indicate the need for action.
- ALPO-3504** **Correction of Zip-Code check**
The verification of the postal code for the consignor and consignee in an ASumA has been corrected.

BUXFIXES

- ALPO-3435** **Creation of follow-up orders via OrderIN EDI interface**
In the case of conventional combined orders that are imported into ALPO via the OrderIN EDI interface, the follow-up order is now also created and sent. Both the initial order and the follow-up job now receive event replies via the EDI interface.
